

BOAT LIFT FOR TRAILER-BOAT

A new unique boat lift for loading and unloading of boats on trailer consists of two foldable lifting units, one on each side of the boat lifted with a strap so that a boat trailer can be rolled in or out under the boat when launching or when the boat comes up on land. Boat stands or a trestle beneath the boat's stern are necessary for loading or unloading. The boat is lifted or lowered when rotating the hand crank on the respective lifting device.

- Instead of having a boat trailer occupy a large place on land you can rent or borrow a trailer and with help of the Boat lift put the boat on trestles or boat stands - cheaper and better in many ways
- No rolls and frame in the way - easier to work with washing, grinding and painting under the boat
- Divide the boat lift with someone - half the cost of the boat lift and no investment in a boat trailer

- Quickly set up and no tools needed
- Stands steady and can also handle leaning ground
- Light and strong of stainless material, aluminum
- Easy to handle the boat lift if you work alone
- Foldable and compact - takes little space to store and can be easily transported in the car

Folded Lift unit

Patent pending

Packaging: 2 cartons of above type, 1640 x 230 x 325 mm

Weight complete assembled	23 + 23 kg
Length, with foot/without foot	1670 / 1590 mm
Lifting height	Approx. up to 450 – 700 mm
Max lifting weight/weight boat	1,5 ton / 2,5 ton
Lifting belt	Approved for U-lift of 2 ton. 7 x safety. In accordance with EN 1492
Lifting wire	Approved for U-lift 3,5 ton. 5 x safety In accordance with EN 12385
Approved	CE
